

Ex. No. 1	Design a Website Using HTML
Date of Exercise	23/07/2026
GitHub Host Link	https://github.com/Manisha-R2405/web-tech.git

Aim

To design and develop a basic HTML webpage using HTML5 elements, images, hyperlinks, lists, and inline CSS to create a simple and user-friendly web page.

Description

This experiment focuses on the fundamentals of HTML. It demonstrates the use of HTML tags such as headings, paragraphs, images, hyperlinks, lists, and semantic elements. Inline CSS is applied to enhance the appearance of the webpage by adding colors, fonts, spacing, borders, alignment, rounded corners, and shadows. The webpage also includes navigation links and images to improve user interaction and presentation.

Procedure:

1. Create a new HTML file with the .html extension.
2. Declare the HTML5 document using `<!DOCTYPE html>`.
3. Create the basic HTML structure using `<html>`, `<head>`, and `<body>` tags.
4. Set the webpage title using the `<title>` tag.
5. Add a header with an image, heading, and tagline.
6. Create content sections using headings and paragraphs.
7. Insert images using the `<img>` tag with appropriate attributes.
8. Create an unordered list to display the training courses.
9. Add hyperlinks using the `<a>` tag with href, target, and title attributes.
10. Apply inline CSS using the style attribute to improve the webpage appearance.
11. Add a footer with the required copyright information.
12. Save the file and open it in a web browser to verify the output.

Program**1A.**

```
<html>

<head>

    <title>My First Page</title>

</head>

<body>

    Welcome to My First Web Page

</body>

</html>
```

1B.

```
<!DOCTYPE html>

<html>

<head>

    <title></title>

</head>

<body>

    <h2>Welcome To WEB TECHNOLOGY LAB</h2>

    <br />

    <p>Hello All.</p>

</body>

</html>
```

1C.

```
<!DOCTYPE html>

<html>
```

```
<head>

  <title>Six Header Tags</title>

</head>

<body>

  <h1>This is Heading 1</h1>

  <h2>This is Heading 2</h2>

  <h3>This is Heading 3</h3>

  <h4>This is Heading 4</h4>

  <h5>This is Heading 5</h5>

  <h6>This is Heading 6</h6>

</body>

</html>
```

1D.

```
<!DOCTYPE html>

<html>

Result

A responsive and visually appealing HTML webpage was successfully created using HTML5 elements and inline CSS. The webpage correctly displayed the header, images, training information, course list, hyperlinks, and footer as specified, demonstrating the use of basic HTML and inline styling techniques.
